

Genealogical Computing Group of New Zealand

Confident Computing for Genealogy

Designed for Beginners • No prior computer experience required

Small class • Hands-on • Friendly learning environment

Build your confidence with computers

Whether you're new to computers or simply want to become more confident using them for genealogy, this practical workshop is designed especially for you. Everything is explained in plain English with plenty of time for questions.

You'll learn how to:

- Understand the basic parts of your computer
- Keep your computer running smoothly
- Organize family history files and photos
- Find downloaded files quickly
- Use Windows or macOS with confidence
- Manage browser tabs and bookmarks
- Stay safe online and avoid scams
- Use stronger passwords and two-factor authentication
- Know when to use AI and when Google is the better choice

Ideal for

- Beginners
- Family historians
- Anyone returning to computing

Bring

- Windows laptop or MacBook
- Power adapter
- Mouse (recommended)
