

# FAMILY HISTORY MEETS MODERN TECHNOLOGY

## Discover • Learn • Connect

Technology is transforming family history. GCG helps you confidently use today's digital tools to discover, preserve and share your family's story.

## WELCOME TO GCG

The Genealogical Computing Group (GCG) established in 1985 is a nationwide Special Interest Group of the New Zealand Society of Genealogists.

We bring genealogy and technology together, helping family historians make the most of computers, tablets, smartphones and online resources.

Whether you're just starting out or an experienced researcher, GCG provides practical learning, useful ideas and friendly support.

## WHY JOIN GCG?

Belonging to GCG means you don't have to work out today's technology on your own.

You gain a friendly community of fellow family historians who are willing to share ideas, experiences and practical solutions.

### **As a member, you can:**

- Build confidence using technology for your family history
- Learn from people who have already tried the tools and techniques you are considering
- Discover new ways to make your research easier, more effective and more rewarding
- Ask questions and get practical help in a supportive environment
- Keep up with changes in technology without having to become a technology expert
- Share your own discoveries and learn from the experiences of other members

Membership also gives you access to our **GenCom News** and its digital back issues.

**Annual subscription: \$15 NZD.**

## WHAT WE EXPLORE

Technology changes quickly—and genealogy is changing with it.

- Genealogy software and databases
- Online archives and research tools
- Artificial Intelligence
- DNA testing and analysis
- Digital photographs and documents
- Scanning and restoration
- Cloud services and backup
- Mobile genealogy
- Family history publishing
- Online safety and data management

And anything else where genealogy meets computing.

## LEARN WITH US

GCG is about more than technology—it is about learning together.

Our sessions can include expert presentations, practical workshops, demonstrations, open Q&A and member show-and-tell sessions.

We encourage members to share discoveries, solve problems together and learn from one another.

We also develop practical learning opportunities for people who want to build their computer skills for genealogy.

## NEW TO GENEALOGY? NEW TO COMPUTERS?

You're welcome at GCG.

You don't need to be a computer expert. Many family historians simply want to feel more confident using the technology available to them.

We aim to make learning practical, understandable and friendly.

No question is too simple.

Come along, ask questions, discover something new and learn at your own pace.
